DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3, 5-7, 9, 10, 13, 21, and 22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

In regard to claims 1, 3, 5-7, 9, 10, 13, 21, and 22, the prior art does not disclose a stereo camera with the combination of limitations specified in the claimed invention, specifically the limitations of:

image processing means for calculating a three-dimensional distance distribution of said object based on a positional difference between a region in a reference image photographed by said main camera and a corresponding area in a comparative image photographed by said sub-camera to an image signal of said region,

wherein said corresponding area is searched in a strip-like search area having a predetermined length which extends from a position substantially corresponding to said region, said positional difference is obtained from an area which is capable of setting said search area inside of said comparative image,

wherein angles of inclination of said main camera and said sub-camera are set to be such angles that said three-dimensional distance distribution is substantially left-right symmetric with respect to a central axis of a vehicle parallel to a forward direction of the vehicle, and the shooting direction parallel to the central axis, as claimed in claims 1, 3, 9, and 22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
